### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. US 6,870,993. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the instant application is merely one of the claimed plurality of modules claimed in claim 1 of the conflicting application.

Further, claim 1 of the instant application does not claim a segment of undersea optical transmission cable. However, claim 1 of the instant application is for undersea use. It is an optical amplifier, which must by necessity, be connected to a segment of transmission cable. Consequently, it would have been obvious to one of ordinary skill in the art (e.g., an optical engineer) to connect the invention of claim 1 in the instant application to a transmission cable for the advantage of optical signal amplification.

3. Claims 8 and 33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 20, and 40,

Art Unit: 3663

respectively, of USP 6,917,465 (application No. 10/715,330). Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 8 of the instant application is merely broader in that it does not claim the isolated electrical path.

***Allowable Subject Matter***

4. If a proper terminal disclaimer is filed, then claims 1, 8, and 23 would be in condition for allowance.
5. Claims 16-30 and 32 are allowed.
6. Claims 2-7, 9-15, 31, and 34-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
